

The Corporation of the College, working with the senior management of the College, periodically reviews the mission and strategic objectives of the College.

The College is committed to seeking the views of all its key stakeholders, including staff and students, in respect of the preservation and development of the mission and educational character of the College. Stakeholder views will be gathered through wide-ranging means, including formal and informal meetings, fora and consultation with staff, students, parents and employers.

The work of the committees of the College includes provision for consultation with the respective membership and wider stakeholders.

The outcome of any consultation process will be reported to members of the Corporation by senior managers before any final decision is reached in respect of any change to the mission or educational character of the College.
