Notes

- The Sixth Form College sector includes Sixth Form Colleges and 16-19 academies.
- Medical, allied and veterinary degrees have been removed from the classification analysis. These degrees are generally classified under a pass/merit/distinction system, which get categorised under 'Unclassified' in the raw data, so they have been removed from the analysis to avoid distortion.
- The lowest participation wards data is formed by ranking wards by the proportion of young people in that area who entered higher education by the age of 19. POLAR4 is based on the cohorts who would have entered higher education between 2009 and 2013. This gives five quintile groups of areas ordered from '1' (those wards with the lowest participation) to '5', (those wards with the highest participation). Students have been allocated to the neighbourhoods on the basis of their home postcode. Those students whose postcode falls within wards with the lowest participation (quintile 1) are denoted as being from a low participation neighbourhood. A map of HE participation rates can be found at: <https://www.officeforstudents.org.uk/data-and-analysis/polar-participation-of-local-areas/map-of-young-participation-areas/>
- Dormant - this category includes students who have suspended their studies but not been formally de-registered.
- All student cohorts are rounded to the nearest five.
