What have we been up to?

Year 1: Following on from our phenomenal visit to the Ashmolean Museum and the Oxford university outreach lectures, we are lucky enough to welcome on, later on in the year Dr. Thomas Mannack FSA, who will be talking about ancient Greek vases, immersing our students in the world of ancient art...with physical samples! Our students will be akin to detectives as we deep dive into the iconography of ancient art with one of the leading experts in this field.

Something you can look forward to ...

Year 2: Are about to embark on an odyssey around Greece! For 5 nights and 6 days, students will be travelling around Athens, Aegina, Olympia and Delphi, taking in the spectacular sights, sounds and tastes of the cradle of civilisation. On our journey we will see world class archaeological sites & museums as well as

astonishingly well-preserved art works, some of which are over 2,500 years old! We will voyage across the sea to the isle of Aegina. We will conquer the mountains that house Delphi and test ourselves at the original Olympic racetrack in Olympia.
