

Area News - Geology

What have we been up to?

In lessons the year 1 geologists are back in the lab next week running a Metamorphism simulation. Our students love being in the lab and working in teams to develop our skills for the practical endorsement.

Something you can look forward to ...

In geology the year 2s have been planning and looking forward to our forthcoming Cornwall residential at the end of March! Food choices done who doesn't like chilli? Sarnies selected. We are nearly ready for the off!

We are staying at Penzance YHA and visiting a myriad of world class geology sites!

The year 1s are raring to get outside in April. We are kicking off our fieldwork seasons with a trip to Hestercombe Gardens, closely followed by Hay Tor on Dartmoor and a visit to the red rocks of Exmouth. We finish our trips this year with a visit to the Jurassic Coast. We cannot wait for ice cream and fossil hunting. Our happy place!!
