## 1) Introduction

This report examines the destination data of our 2025 leavers. The diversity of destinations presented in this report reflects the extensive and comprehensive provision of advice and guidance that is offered to students throughout their time at Huish. The sources of student destination information include UCAS data, apprenticeship providers, progress reviews, and personal contact with students and parents. This is the eleventh year this report has been produced, which allows us to meaningfully analyse the year-on-year trends and comment on changes seen between groups of leavers.

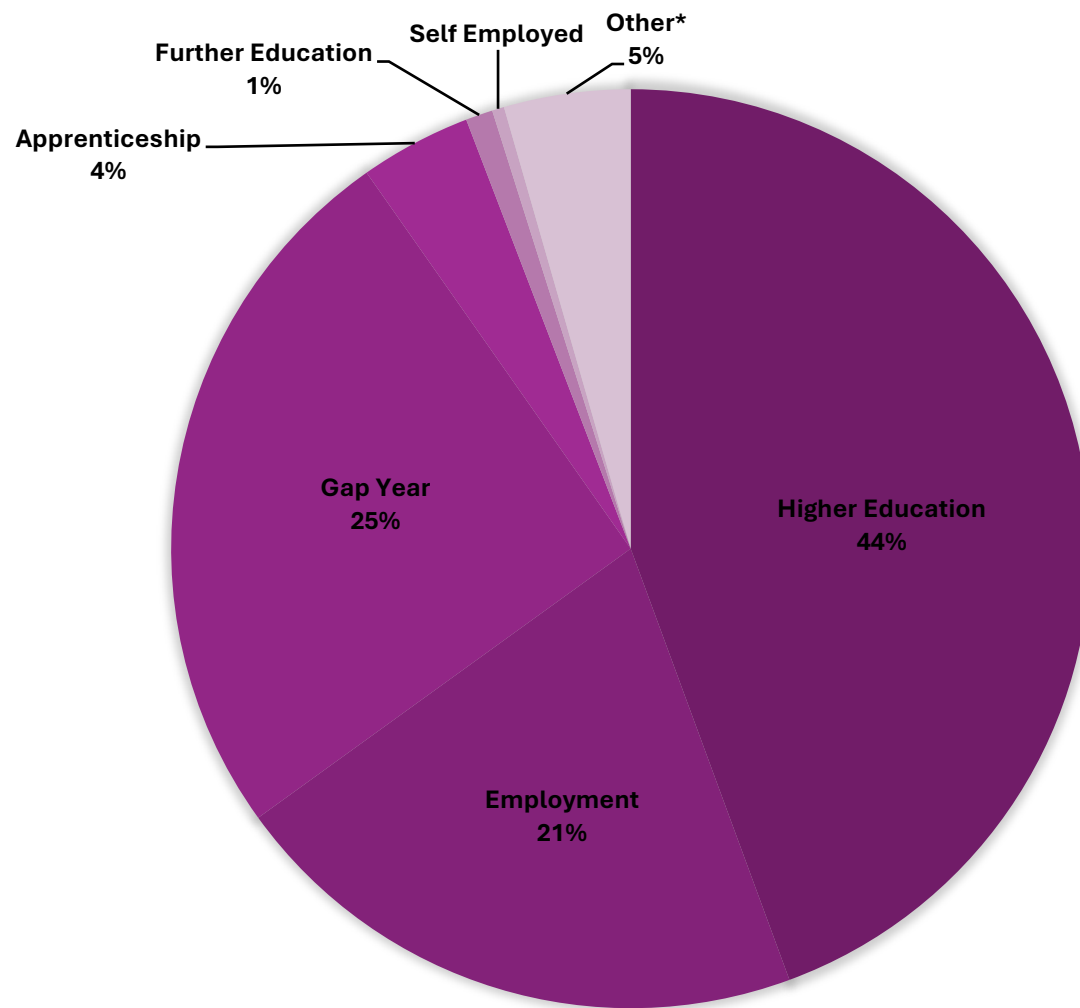

Level 2 student destinations have been included with a separate summary due to the range of different options available to Level 2 students.

### c) Degree Classification Results of Richard Huish College Alumni

This data, provided by the Sixth Form Colleges Association, outlines the degree performance of Richard Huish College alumni who graduated in 2025/26. When looking at all Higher Education Institutions, the proportion of Richard Huish students who achieve a first class or upper second class honours is 8 percentage points higher than the Sixth Form College sector. Students from areas with the lowest HE participation rate achieved more first class or upper second class honours than all sectors, except the Independent sector. This was also the case for students who parents do not have HE qualifications.

Russell Group degree classification students from Huish outperformed all other sectors in terms of first class and upper second class honours, with 93% achieving these grades.

All 4 of these degree classification groups have shown clearly that Huish is preparing students extremely well for higher education. Further to this, Huish is evidently supporting students from disadvantaged backgrounds to achieve highly in their next steps in life.
